

MAYOWA MAKINDE

Software Engineer | Full-Stack Developer

[+234 704 082 9383](tel:+2347040829383) | mayowamakinde23@gmail.com | mayowamakinde.dev | github.com/mayormankind | linkedin.com/in/makinde-mayowa-4670a51bb/

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and deploying full-stack web applications using JavaScript, TypeScript, React, Next.js, Node.js, REST APIs, and relational databases. Experienced in building production systems, integrating third-party services, working with AI APIs, and taking features from system design through deployment. Comfortable working independently and collaborating with teams.

EXPERIENCE

Software Engineer — Rexta Technologies 2026 – Present

Independent Contractor | Project-based engagement

- Develop and maintain web applications and software solutions for client and internal business needs.
- Build responsive interfaces, backend functionality, APIs, and database integrations using modern JavaScript/TypeScript technologies.
- Collaborate with stakeholders to understand requirements, deliver features, and resolve technical issues within project timelines.

Independent Software Engineer 2022 – Present

- Built and deployed full-stack web applications across education, risk intelligence, booking, organizational, and business use cases.
- Developed backend services and REST APIs with Node.js and Express, integrating PostgreSQL, MongoDB, Firebase, Supabase, and third-party services.
- Implemented authentication, authorization, database workflows, payments, messaging, file storage, and other production application features.
- Led end-to-end development of EduGrade, a multi-role school management platform, and contributed to RIOS, a multi-tenant risk intelligence platform.

Frontend Engineer — Pyvot360, Ibadan Feb 2020 – Apr 2022

- Developed responsive interfaces using React and JavaScript, with emphasis on reusable components and cross-device usability.
- Refactored component architecture to improve reusability and reduce frontend complexity.
- Implemented SEO and performance improvements including lazy loading, code splitting, and metadata optimization.
- Collaborated with UI/UX team members to implement accessible design patterns aligned with WCAG practices.

SELECTED PROJECTS

RIOS — Risk Intelligence Operating System — Multi-tenant B2B platform for risk intelligence, ESG data, reporting, dashboards, and AI-assisted news/social classification. Built with Next.js, TypeScript, PostgreSQL, Mapbox, and OpenAI APIs. <https://riosintell.com/>

EduGrade — School management platform supporting academic workflows and multiple user roles. Built with Next.js, TypeScript, PostgreSQL, Prisma, and modern web technologies. <https://edugrade-pink.vercel.app/>

Rehevo — AI-powered platform for practicing high-stakes conversations such as interviews, thesis defenses, pitches, and difficult workplace discussions. Built with Next.js, TypeScript, and OpenAI APIs, with a focus on real-time conversational practice and structured feedback. <https://rehevo.vercel.app>

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, Zustand

Backend: Node.js, Express.js, REST APIs, Prisma

Databases: PostgreSQL, MongoDB, Firebase, Supabase

AI & Integrations: OpenAI APIs, AI-powered application development, third-party API integrations

Tools: Git, GitHub

EDUCATION

B.Tech, Information Systems — Federal University of Technology, Akure (FUTA) 2026
